

## Maintenance Technician

**Number of Positions:** one (1)

**Contract Type:** Definite with option to extend

### Job description

For this position, preference will be given to EU / EEA / UK passport holders or TCNs presently residing in Malta with the required permits. If the position remains unfilled, we will consider other experienced candidates.

The successful candidate will be part of the team responsible for the general installation and maintenance of the company's facilities, covering labs, stores and offices as well as assist the different departments with a variety of tasks. These responsibilities may include, but are not limited to:

- Working within the maintenance and installations team, completing daily/routine tasks.
- Maintenance, repair and installation of electrical and plumbing equipment, water heating and cooling equipment for the building and research facilities.
- Equipment maintenance, repair and installation, including water pumps, filtration equipment, water heating and cooling equipment, ventilation, water dosing equipment and monitoring systems.
- Quality Assurance documentation of Maintenance, ability to plan preventative maintenance tasks and update a computerised maintenance management system.
- Contributing to continuous improvement efforts in the installation and maintenance function by reviewing procedures and implementing sustained process improvements.
- Installation work that may be needed in the Company's projects abroad.
- Be an active participant in an on-call rota, to address urgent issues and support daily operational outside of regular working hours.

### Requirements

Reporting directly to the Facilities Manager, the position is demanding, requiring a person who is highly motivated, self-organised, possesses a high level of integrity and discipline with a strong work ethic and able to establish and maintain effective working relationships with the rest of the team.

The selected person must be prepared to work to very tight deadlines in isolated and multi-functional projects and in conjunction with a team of international staff based at our head-office in Malta, as well as staff who are working at our foreign project sites

### Qualifications Overview:

- The successful candidate must have a solid background in maintenance, installation work or any other similar position.
- A track record of experience of successfully working with electrical, mechanical, plumbing equipment, and water heating and cooling equipment is a requirement. Having experience in HVAC installation and maintenance experience is advantageous.
- The selected candidate will have to speak and write English fluently. Knowledge of any other languages would be considered an asset, although not essential. The selected candidate must have a clear passport with no travel restrictions; no legal convictions held at any time and be in possession of a clean driving licence. The selected candidate should be ready and willing to go abroad on installation projects for extended period of times.

**Training provided**

On the job training will be provided

**Any assistance with accommodation/relocation**

AquaBioTech offers the possibility to use our company shared leased accommodation. Each apartment is within walking distance of our offices and all have three separate bedrooms and two bathrooms with the common parts like the kitchen, living and dining areas shared. This is the preferred option for most people as it also gives them time to explore the island and find somewhere else to lease should they prefer to live alone.

**Salary**

€18,000 to €25,000, depending on experience

**How will the interviews be held**

Interviews will be held either online or in person

**To apply**
